

Safezone 850 Max / Max Plus / CDC Specification Sheet

The Safezone family of products are specifically designed for maximum effectiveness and ease of use. UVC Cleaning Systems Inc.® has developed one of the most efficient solutions for all infection control.

Transportable: The Safezone Family of products have been designed for the institutional environment with five (5) medical grade casters to provide stability and ease of movement in any direction.

Easy to use: The Safezone 850 Max & Max Plus utilize a very simple to use wireless remote control.

Durable: The Safezone family of products are made with a stainless steel cage and an aluminum protective body. The UVC emitters are designed for the physically demanding environmental services industry. Handles are designed as crash bars to minimize accidental damage. Devices ship fully assembled and ready for duty.

Versatile: The Safezone family of products can be disassembled quickly so they can be placed into smaller work areas like ambulances, buses, helicopters, etc.

Intelligent: The Safezone 850 Max & Max Plus use a simple integrated electronic timer to operate with the technician determining the correct run time for each UVC treatment. UVC Cleaning Systems Inc.® also offers an electronic dosimeter, as well as a color changing ink dosimeter to help gauge your decontamination progress.

Quick: Rapid set up and deployment, instant start lamps, this unit is designed to be quick and easy to treat many areas very quickly and efficiently.

Effective: Safezone Products provide a lethal UVC dose of 850 watts.

Safe: Two step operations ensure a safe environment. To operate, users must turn the timer switch and activate the unit using the wireless remote or phone/tablet (CDC).

Affordable: Priced competitive to the marketplace, the Safezone Family of Products are the markets best choice for quick, simple UVC treatments.
